Fortune Oliseyenum

Frontend Developer (Web & Mobile)

Lagos, Nigeria
+2349060955362
Email: fortuneoliseyenum12@gmail.com, LinkedIn: Fortune Oliseyenum

Performance-driven Frontend and Mobile Software Engineer specializing in the TypeScript, JavaScript, and React/Next.js ecosystem, with deep expertise in orchestrating scalable web architectures and real-time mobile applications. Proven track record of resolving complex architectural bottlenecks to drive user acquisition, including accelerating a legacy React Native platform to 50,000+ installs. Recognized for guiding cross-functional team collaboration to translate complex business requirements into pixel-perfect, high-performance digital products.

AREAS OF EXPERTISE

- ReactJs
- NextJs
- React Native
- Typescript
- JavaScript (ES6+)
- TailwindCss
- Redux Toolkit
- REST APIs & WebSockets
- Git & GitHub

PROFESSIONAL EXPERIENCE

LOOPSCRIBE **Melbourne, Australia(Remote)**
Frontend and Mobile Developer Jan *2025–April, 2026*

- Engineered an interactive clinical examination platform with AI-powered patient and examiner simulations using ElevenLabs, React.js, and Next.js, directly securing the startup's highest-paying subscription tier at $500/month.
- Architected real-time functionality and communication flows using WebSockets and GraphQL to enable seamless, low-latency assessment experiences for users.
- Developed a multi-tenant SaaS platform leveraging Next.js, TypeScript, and REST APIs that empowers creators to build, customize, and manage proprietary exam and quiz systems in real time.
- Designed an admin dashboard featuring AI-assisted tools for generating clinical exam content, significantly optimizing workflow efficiency for content creators.
- Co-developed an AI-powered mobile podcast application using React Native and WebSockets, driving rapid user adoption to achieve 10,000+ downloads within the first month of launch.

SPOTMATE **Dublin, Ireland(Remote)**
Mobile Developer *August 2024–August, 2025*

- Co-developed SpotMate, a cross-platform gym workout application, leveraging React Native and Next.js to implement high-engagement social features, including real-time activity feeds, posts, and user routine sharing
- Constructed an interactive workout routine builder utilizing TypeScript and React Native, integrating animated image assets to enhance visual guidance and improve user retention.
- Implemented comprehensive fitness tracking mechanics that allowed users to seamlessly monitor goals and log historical achievements, significantly optimizing user workflow for progress management.

THEBIZGROWTHHACKERZ **Lagos, Nigeria**
Frontend and Mobile Developer *May 2024–October, 2024*

- Spearheaded a major application overhaul for a legacy fintech mobile app (React Native, TypeScript), driving user growth from under 10k to 50,000+ installs in under 12 months by optimizing performance and fixing critical UI stability bottlenecks
- Orchestrated secure financial workflows via the Paystack SDK, building frictionless transaction pipelines for data, airtime, and utility bills that drastically accelerated user acquisition velocity.
- Authored a custom CMS and portfolio platform using Next.js and TypeScript, integrating a dynamic project showcase, automated blogging engine, and an administrative dashboard for unified content operations.
- Built an enterprise agricultural management system using React.js and REST APIs, engineering core modules for full-lifecycle farm tracking, machinery documentation, and predictive activity scheduling.
- Formulated a robust Role-Based Access Control (RBAC) system and user provisioning dashboard within the agricultural platform, enabling secure multi-tier permissions (Agents, Farmers, Admins) and dynamic role assignment.

FREELANCE **Lagos, Nigeria**
Frontend and Mobile Developer *January 2024–Present*

- Executed the cross-platform frontend architecture (Web & Mobile) for *Ahiaukwu*, a multi-tenant e-commerce and logistics platform utilizing Next.js and React Native to deliver seamless vendor and customer experiences.
- Created an intuitive electric vehicle (EV) mobile application using React Native and TypeScript, integrating interactive mapping APIs for charging point and repair shop discovery alongside full-scale product/accessory checkouts.
- Developed and maintained enterprise e-commerce platforms (*Suruhub* and a specialized medical eyewear marketplace) using Next.js and React.js, implementing complex state filtering for prescriptions/lens specifications and secure payment integrations.
- Programmed a data-driven project monitoring application using Ionic React and TypeScript, streamlining pipeline tracking and client management workflows to increase project visibility significantly.

READERSPLUG **Lagos, Nigeria**
Frontend Developer *April 2023–July, 2024*

- Streamlined data retrieval and profile configuration workflows by implementing a high-performance, dynamic search feature and integrating robust REST APIs using React.js and Tailwind CSS.
- Built an intuitive client-side note-taking application using TypeScript and React.js, managing complex UI states to deliver seamless CRUD functionality and boost user productivity.

VICCO COMPUTER ACADEMY **Lagos, Nigeria**
Software Developer Intern *September 2022–February, 2023*

- Translated complex Figma prototypes into pixel-perfect**,** fully responsive web interfaces using HTML5, CSS3, and modern JavaScript, ensuring seamless cross-device compatibility and precise design execution.
- Optimized legacy web pages and engineered interactive UI components (dynamic forms, navigation structures, and layouts), significantly improving client-side rendering speed, accessibility, and site-wide maintainability.

EDUCATION

DELTA STATE POLYTECHNIC *November 2016–December, 2021*
Accounting

PROJECTS

Ahiaukwu — *E-Commerce and Logistics Platform (Next.js, React Native)*

DotmanWallet — *Fintech Utility Bills Mobile App (React Native, TypeScript)*

Suruhub - Vendor Marketplace Platform (React.js, JavaScript)
